

# 16th Caribbean Foresters Meeting Proceedings: A Special Issue of the Caribbean Naturalist Journal

## Instructions for Submissions

*Caribbean Naturalist* is a peer-reviewed journal that publishes original articles on field research of all aspects of the biology and ecology of terrestrial, freshwater, and marine organisms and the environments of the Caribbean region. It is published by the Eagle Hill Institute.

A special issue will be produced with collaborations from participants of the 16th Caribbean Foresters Meeting on *Forest Management, Climate Change and Biodiversity: Advancing an understanding of Caribbean forest dynamics and creating long-term regional networks*. This special issue will serve as the Proceedings for this year's meeting.

All participants of the 16th Caribbean Foresters Meeting and other collaborators are encouraged to submit.

**Proposed Title for the Special Issue:** Caribbean forest dynamics under changing environmental conditions

**Subjects or Areas of Interest:** The basis for the volume will be the contributed presentations, and the outcomes of working groups and workshop during the 5-day meeting. In particular, we will look for contributions related to the outcomes of the workshop titled "Assessment of Long-Term Forest Dynamics in the Caribbean" and those that address ecological issues of stand dynamics in the Caribbean as a result of environmental change, such as hurricane effects.

**Proposed Co-Editors:** Tamara Heartsill Scalley, Gerald Bauer and Grizelle González

### Guidelines:

\*[\*Submission guidelines and author guidelines\*](#).

\*[\*Manuscript submissions program\*](#).

**Deadline for Manuscript Submissions:** Monday, November 25, 2013

**Contact Editor:** For questions, contact [Tamara Heartsill Scalley](#).

**Institutional Support:** Sponsoring organizations for this special issue include the [Fundación Puertorriqueña de Conservación](#) and the USDA-Forest Service [International Institute of Tropical Forestry](#).

**For More Information:** Visit the [Caribbean Foresters' website](#) to view Proceedings from previous meetings.
